Knowing that your e-mails are kept safely even when your system is down..

Hostpro2u E-mail Relay Hosting.
Your Disaster Recovery Solution.

In today's global economy, someone else from another part of the world is sending important mail and doing business with you 24/7. If your mail server fails, your business might fail too. With Hostpro2u's E-mail relay hosting though, mail outages are a thing of the past!

Enjoy a problem-free e-mail service with Hostpro2u's E-mail Relay Hosting. How? Hostpro2u will ensure that you get uninterrupted e-mail service by storing e-mails in our datacentre when your server is offline and attempts to send them to you instantaneously once your server is back online.

Hostpro2u.com
Your Right Hosting Partner

Requirements

- Works with any E-mail server software
- One public IP address

Who can use it?

We recommend the E-mail Relay Hosting package for customers with mail servers using leased line/ broadband/ ISDN/ Streamyx/ Satellite dish connections without a backup mail server.

Solution Functionalities and Features

- All incoming mail will be scanned before it reaches our mail server.
- All outgoing mail will be scanned before being sent out from our mail server.
- Does not require software installation in your existing mail server.
- Does not require additional configuration in your existing mail server.
- Your business partners/customers will never receive bounced mails from you.
- Mail space pre-allocated for mail storage.
- Anti-virus protection for virus scan.
- 24x7 DNS Administration.
- 24x7 Technical Support.
- Mail Backup Server in multiple locations around the world to give 99.99% uptime guarantee.
